

MFS ACRYLIC SURFACES

PRODUCT BROCHURE

Introduction

Company established in 1985 to produce Acrylic sheets. It provides solutions in commercial, marketing, design, and construction sectors in Turkey since the beginning. The company also chased the involvements in global phase and created the acrylic solid surface brand which is called 'MFS SURFACES' to fulfill the need for solid surface material in bathroom, kitchen, and luxury interior design markets. MFS produces acrylic sheets for international market and exports its products for decades. The production has been moved to the city of Düzce in 2012 from Istanbul to be able to increase the production capacity. Our two factories cover an area of 28000 Square meters where 220 hard working personnel are producing 750 tons of MFS SURFACES 100% acrylic solid surface sheets per month.

Hard working , Made in Turkey”

Since the beginning, the company became the most developed and the leader Turkish supplier in acrylic sheet market. MFS satisfied the customer's needs with its renowned brand MFS SURFACES .

Our latest technologies bring our customers enormous advantages in energy consumption and price. Environmental standards are very important for us. That is why MFS is working in conformity with ISO code 14001 and ISO code 9001 and in 2016 succeed to get CE and started to export to Europe. Developing our presence in North American market is one of our strategic goals and for that MFS has succeed to get the NSF code this year.

The Company has continuously increased both its production capacity and product quality and has become one of the leading producers on a global scale. In Production Facility, MFS produces:

- 750 tons of PMMA acrylic sheets
- With 20 different sizes in more than 500 different color...

MFS SURFACES

Innovative MFS SURFACES, 100% acrylic solid surfaces, provides high-performance material in superior standards. The homogenous structure of MFS SURFACES sheets allows easy restoration and high level of hygiene. The solid micro level structure of MFS SURFACES sheets inhibits the growth of bacteria or fungi. As a result, MFS SURFACES sheets are not only preferred in the kitchen but also in restaurants, hospitals, laboratories, and schools.

Maryfass Company is the leading producer of the solid surface acrylic sheet in Turkey with its capacity of 250 tons of production per month.

Global Market

The original solid surface established in the late 60s is made by DuPont and is called Corian, after which most companies started to produce acrylic and polyester.

MFS also started producing Acrylic sheets from 2001 besides our plexiglass sheets. We have more than 56 colors and types and also can produce any models as requested by the customer in different thicknesses from 4mm to 20mm and also similar to any models from Staron, Corian, Hi-macs and etc.
